GREEN CAMPUS POLICY

Fateh Chand College for Women, Hisar try to incorporate best practices at institutional levels to minimize the impact on environment and ensure resilience and sustainability. We are committed to fulfill the legitimate requirements of our present generation without compromising the ability of future generations to meet their own needs in line with sustainable development goals (SDGs). The college strives to reconcile institutional activities with environmental conservation for a safe and secure future in the era of climate change. Taking into account the necessity of promoting environment for a sustainable, pollution free and healthy life on the earth in the coming years, the college has formed its green protocol. The college endeavors to follow this policy strictly by actually enacting to and creating environmental consciousness among the students and thereby among the society in general by organizing various activities within and outside the campus. A green campus is a place where environment friendly practices and education combine to promote sustainable and eco-friendly practices in the campus.

Mission

The Green Campus Policy of the college is made to provide an overview of the College's vision to protect the environment, natural resources and develop environmental consciousness for a sustainable, pollution free and healthy life ahead. The policy statement highlights how the college would pursue environmental best practices and inspire the sustainable use of resources at the community level within and outside college premise. Its goal is to reduce energy and raw materials consumption that could jeopardize the sustainability measures being taken at college level. This policy will communicate the College administration's goals and objectives to College employees, students, and staffs, as well as aid in the creation of a better environment for future generations.

Objectives

- To aware students and college staff about the use of pollution free biodegradable products and avoid polluting products.
- To make the use of non- conventional methods of energy in the campus and encourage a suitable waste management mechanism.
- To continuously improve the efficient use of all resources, including energy and water and reduce consumption and the amount of waste produced.
- To make students and staff aware about the importance of cleanliness and promote environment friendly practices in society.
- Instilling in young people an environmental ethic and value system.
